No residential soil cleanup in telluride. Idarado paid for voluntary lead screening of children 6 years and younger for five running years.
A VCUP in Rico cleaned up residential soils. I do not know, but can inquire about contractor if you would like.

Hi Camille - Thanks for your note. Let's stay in touch about next year's conference, and I'll see what we can do.

I'll look for the PA/SI reports for any available soils data. I also wanted to ask if you knew whether there were any residential soil cleanups performed in Telluride, and if so, who conducted them.

Thanks,
Steve

Dear Steve,

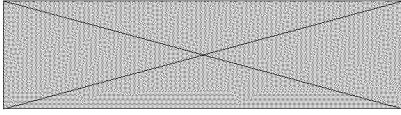

It was nice meeting you at the conference in Telluride last week. Thank you for reaching out to me to let the organizing committee know that EPA may be able to help with sponsorship in the future. We appreciate EPA's wanting to support the conference, which as you experienced, is a good place for people to share ideas, experiences and increase everyone's understanding of what is being accomplished - which is a lot!

A reminder to look at PASI reports I prepared for EPA when I worked with CDPHE in the 1990's - Either Cement Creek or Upper Animas SI reports may have a couple of front yard soil sample results.

Thanks again,

Camille Price
